Station Log

Activity 2.2.1 · Creative Stations. One brief, at least three stations. Round 1 is always the brief, pasted exactly as written. Every round after that changes **one** thing.

Name		**Period**		**Date**	

1 · My brief (write this before you open any tool)

Theme	
Mood (a taste)	
Must include (up to two)	
Avoid (one)	

Station forms: Words: a scene of about 60 words. Image: one picture. Sound: a 20-second loop. Build: a one-screen page.

2 · Criteria and taste (written before round 1)

Each criterion must be something a stranger could answer yes or no. Criterion 4 is the form check for each station.

#	**Criterion (yes or no)**
1	Includes:
2	Includes:
3	Avoids:
4	Form check, station by station: Words _____ Image _____ Sound _____ Build _____

Taste: rate how well the result fits the mood, 1 to 5, on its own line. Never count it as a criterion.

3 · Station logs

Tags for a miss: **Left out** (a must-include is missing) · **Broke a limit** (something to avoid is there) · **Garbled** (letters, counts, shapes wrong) · **Drift** (something right got lost) · **Generic** (fits, but could be anyone's). Change types: **Add, Change, Remove, Move**. Stop at 4 of 4, or after 5 rounds.

4 · Compare the stations

Station	Tool	Rounds used	Brief-fit (best round)	Taste (1–5)	Biggest failure tag

Which station would I use for which job, and why? Use your numbers.

5 · Credit and claims

Pick one round from your logs where a single change moved the criteria. Pick one where two changes were made at once, or a change did nothing.

Round	What changed	**What the log can say** (probably that change · can't tell · did nothing)

Three claims for my report. Mark each: L = my log shows this · T = test it more · X = a log can't show this. Only L claims go in the report as facts.

Claim	L / T / X
